

Review of the event about CCF in “Biblioteca Kaos” on may 26th

Dealing with the perpetual technical problems that the comrades who attend the library already know, we present the book “Our day will Come” that we traduced to portuguese and we watched the movie made by CCF comrades “Phoenix Project. The return of Cells of Fire Conspiracy”.

We began the event with the reading of the words written by the comrades of “Sin Bandera, ni Frontera”, core of agitation and anti-authoritarian propaganda from Chile, of Kataklysmia contra information blog, of Spyros Mandylos and of the CCF comrades. We know that these words arrived to us and teased us deeply; that listen to them was an important moment of the event. It would have been difficult not to feel us captivated by the strenght of the messages read and the firmness that they transmit. After the reading, we watched the video of the Phoenix Project, the words and voices of the comrades in the video made all of us feel closer of the comrades, and, at the same time in which we delighted with the accurate attacks against domination.

Breaking grades, frontiers and distance that separates us was one of our aim with the initiative of realizing this event. We believe that in this breaking, resides the solidarity, at the end, transforming distant in near, we bring seeds for the insurrect action in this territory, and we know that it doesn't exist better solidarity act that the attack. Nevertheless, this event was one more impulse so that we have to keep sharpen ours knives pointing against Power...

probably the complicities and conspiracies which are growing from this event could be observed only with time going on... and in the darkness of the nights. It can't exist indifference in front of these convictions. Because, paraphrasing one of the person at the end of the event “ everyone of us can be a cell of fire...” The beauty will be giving the step between words and action.

Our salute, complicity and insurrect affection for the Cell of fire Conspiracy comrades and Spyros Mandylos!!!

Strength and solidarity with those who are struggling

Thanks for Sin Banderas ni Fronteras, Kataklysmia, for all the comrades with helped in the translation and correction of the text.

Biblioteca Kaos

the book will be available in pdf version and print version in June in our contact by mail: biblioteca-kaos@riseup.net.
